Learning Environment Mission Statement		We aim to follow a developmental model, which is, based on the belief that the relationship between the nurse and the patient is an opportunity for both to achieve growth in the form of their personal development.	

### LEARNING ENVIRONMENT PROFILE

General Information	<a href="http://www.iow.nhs.uk/Working-With-Us/learning-zone/student-welcome.htm">http://www.iow.nhs.uk/Working-With-Us/learning-zone/student-welcome.htm</a>
Description of Service and Client Group	The unit provides an individualised assessment, care and treatment for both male and female patients, with a range of mental health problems, who require a more intensive nursing approach and high levels of observation. Generally, patients are admitted because they are acutely disturbed, requiring a low secure environment with low stimulation facilities or drug free assessments. In addition, the patient should be considered to be of a high risk either to themselves or others. The main function is for short term nursing input until significant risks have been reduced to a safe level, enabling the patient to be transferred to a ward or facility suitable for their individual needs or be discharged. All patients are detained under the mental health act and are usually working age adults. The team work on a Safe Wards model, which includes exploring and encouraging a variety of therapeutic interventions to aid engagement with patients and reduce the risk of harm to self and others.
Description of related services & Client group	CRHT, Operation Serenity, Medical Services, Rehabilitation , Social Care, Drug & Alcohol Services, Community Mental Health Teams, IAPT, Social Services- including safeguarding team, Children’s Services, Police, Probation, Forensic Services, Primary Care, ECT clinic
